

Technical features

Armchair for theatre, conference and auditorium

Typologies

Sipario is available in the "Standard" and "Large" version with backrest with thicker padding and larger side.

All versions are available with floor-length sides or on beam of 2-3 places connected in rows.

Installation on flat and sloped floor or on steps, in straight or curved rows for armchairs with floor-length sides (minimum radius 8 m).

Variable centre-to-centre distance from 52 to 58 cm for the Standard version, from 55 to 60 cm for the Large version.

Seat and backrest

Seat and backrest with internal support in plywood, padding in flame retardant, non-deformable, expanded polyurethane foam.

CertiPUR® certified padding. Wooden components with low formaldehyde emission.

Backrest inclination available with two different angles to facilitate a perfect view at all times, for stalls or gallery

Gravity tip-up seat, with steel rotation pins which are anchored to the metal structure

Only Standard version available with round backrest.

Seat and backrest fully covered with fabric, faux-leather or leather.

Sides

Bearing side with internal plywood structure, provided with an aluminium block designed to insert the rotation and seat support pins.

Fully padded sides or in painted wood with beech or oak finishes.

It can be applied an added armrest, fully padded and covered or with painted wood finishes (beech or oak).

Wooden components with low formaldehyde emission.

Fabric, leather or faux-leather covering.

Right sides can be fitted with foldaway tip-up writing tablet in black stratified HPL and aluminum die casting joint, with anti-panic movement.

Floor-anchor feet in moulded sheet metal covered by a protective semi-matt black RAL 9005 or semi-matt silver scratchproof and anti-corrosion epoxy powder paint.

Also available the beam-mounted version (2 or 3 places) in tubular steel square section, painted with scratchproof and anti-corrosion epoxy powder paint in semi-matt black RAL 9005, semi-matt silver, embossed bronze or embossed graphite finish.

In the beam-mounted version, the sides have the same characteristics but are available with one height side panels resting on the beam (with the exception of the sides starting row which can also reach the ground).

Accessories

Tip-up writing table on single base mod T200.

Foldaway tip-up writing tablet in black stratified HPL with antipanic movement.

Seat and row identification elements.

Electrification provision (socket on demand)

Low panel for backrest with beech or oak finishes

Painted wood high backrest panel with beech or oak finishes

Under seat wood panel, with beech or oak finishes

Optional system allowing armchairs to be moved away (on wheels) in 2 or 3 seat units when unused (available for armchairs with floor-fixing structure in straight rows).

Tested according to European standards.
